

DENTRIX® WEBSITE MANAGER

Make the Internet work harder for your practice

Your patients expect you to have more than a simple brochure-like website. Give patients the useful functionality and valuable resources they're looking for. Dentrix Website Manager provides your patients with powerful online tools that allow them to interact with your practice 24-hours a day.

Website Manager equips your practice with a Dentrix-integrated website where patients can view appointments, treatment plans and account balances online. Patients can even use your website to complete forms or make payments. Plus, Website Manager makes it easy to add a kiosk for collecting electronic patient forms from your reception area.

Dentrix Website Manager Features:

- Integrated website hosting
- Secure patient login
- Integrated online patient forms
- Easy editing tools
- Comprehensive patient education
- Website visitor reports
- Free, instant software updates
- Toll-free live customer support
- No annual contracts
- Automatic, instant synchronization with your practice management software

Give patients the ability to request appointments online

Make appointment scheduling easier for your patients and your front desk. Your patients can request an appointment through your website. This feature allows patients to initiate the appointment discussion when it's convenient for them and without waiting on hold. The appointment request forms provide your front desk team with the necessary information to schedule appointment times that work for the practice and the patients.

Collect forms online to reduce manual entry

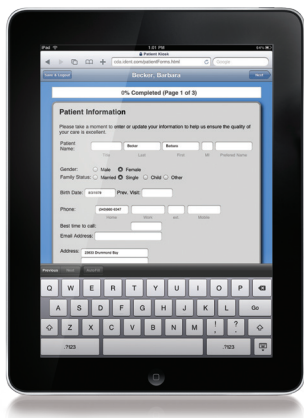

Allow patients to complete forms when it's more convenient for them and more efficient for your front office. Your patients can log on to your website and complete their forms from the comfort of home. This not only reduces the amount of time patients need to spend in the reception area, it speeds up the check-in process for your team. The completed forms are automatically submitted to your front desk where they can be reviewed and accepted into Dentrix with just a couple clicks of the mouse.

Your Practice Will:

- Reduce manual entry with electronic patient forms
- Improve patient experience by utilizing convenient, timesaving technology
- Improve front-office productivity by reducing phone calls and manual data entry
- Reduce appointment delays by importing patient data electronically
- Improve cash flow by providing online payment capability

Website Manager provides website options ranging from a library of do-it-yourself templates to a customized site with Adobe® Flash® programming.

Kiosk feature allows patients to complete forms from a variety of hardware options, including Apple iPad

Say goodbye to the clipboard

Eliminate manual entry and the clipboard by allowing patients to complete their forms on a kiosk. With a kiosk, forms not completed online can be conveniently completed or updated electronically in your reception area. Dentrix Kiosk allows you to collect patient forms using touch-screen monitors, laptops, tablet PCs and even Apple® iPads™. Forms completed on your kiosk, like those submitted from your website, can be imported into Dentrix with just a few clicks of the mouse. In addition to eliminating the time-consuming, error-prone process of manually entering patient data, it also allows treatment to begin faster.

Improve collections with online payment acceptance

Let your patients pay their bills online and improve collections. With Website Manager, your patients can log on to your website to view account balances and make online payments. Online payments post automatically to your Dentrix Ledger, eliminating double entry and accounting errors. The added convenience makes it easier for your patients to pay their balances and faster for you to receive the payments. While on your website, patients can also view their upcoming appointments and treatment plans.

Get the right functionality on the right website

Website Manager gives you all the tools to build your website quickly and easily; or the option to have it built for you. The large template library allows you to choose a website design that best meets your practice's needs. Customized websites are also available to better ensure a perfect branding match for your practice. Once setup, your integrated website will update patient data automatically from your Dentrix software.

Take the Next Step
