DENTRIX WEBSITE MANAGER

Give patients and prospects online access to your practice

Website Manager helps you:

Attract new patients and engage with existing patients so they can communicate with your practice anytime, online.

No More Clipboards

Patient information and medical history forms can be filled out or updated online instead of in your office. Website Manager then updates Dentrix accordingly, saving time and reducing paper in your practice.

UPDATE PATIENT DATA AND COLLECT PAYMENTS ONLINE

Entering and updating patient information manually is a time-consuming chore for your patients and your team. Filling out forms in your office can delay your schedule and slow down production. Inaccurate or incomplete patient forms completed in haste can cause problems with insurance claims and collections.

An interactive practice website can solve patient data problems and deliver information about your practice to patients and prospects alike. When future patients are searching online for a dentist, they should be able to find your practice and request an appointment.

Dentrix Website Manager helps you build and enhance your website so new patients can find you, and existing patients can communicate with you. Patients can update their data, request appointments, view account balances and pay their bills—at their convenience— from any location.

SAVE TIME AND SYNCHRONIZE WITH DENTRIX

Because it's fully integrated with Dentrix, patients can complete forms on your website, and Website Manager automatically submits them to the Questionnaires Module, Family File and so on. This significantly reduces manual data entry in your practice.

When patients submit payments online, Website Manager updates your Dentrix Ledger. It also reduces inbound phone calls by allowing patients to request appointments online.

DID YOU KNOW? Our Dentrix Service Bundles are packed with eServices—powerful tools connected to Dentrix that help boost your front office productivity and streamline your workflow.

Automate even more tasks by bundling Website Manager with other powerful eServices tools.

HENRY SCHEIN®

With Website Manager, your patients have round-the-clock access to view upcoming appointments, treatment plans and account balances, easily accessible on your practice website.

KEY BENEFITS

Engage with your patients. Reach them on their smart phones and tablets with a responsive website design.

Stay on schedule. Provide forms online so patients can complete them before their appointments.

Save time. Reduce manual data entry and inbound phone calls for your team with online forms and appointment requests.

Improve accuracy. Decrease data input errors by letting patients update their own contact information and medical history whenever necessary.

Expedite payments. Allow patients to see their balances and submit payments from your website.

Provide dental health tips. Post updated content automatically as a benefit to your patients.

KEY FEATURES

ONLINE PATIENT FORMS
Eliminate manual data entry and improve information accuracy. Patients can use PCs or mobile devices to fill in forms.

IN-OFFICE PATIENT KIOSK
Replace clipboards and paper forms with a computer tablet for patients to enter their information in your reception area or patient chair.

PATIENT PORTAL
Let patients log in to privately view their appointments, treatment plans, account balances and payment plans.

MOBILE FRIENDLY TEMPLATES
Make sure your website works properly on mobile devices with your choice of mobile friendly templates.

WEBSITE REPORTS
See how many people are visiting your site and which pages they are viewing.

TEMPLATE LIBRARY
Choose from a large selection of design templates to help your website match the branding of your practice.
