Dentrix Solutions for Your Top 4 Insurance Challenges

We surveyed thousands of Dentrix users to identify the top four insurance challenges that today's practices face. In this interactive class, you'll learn best practices in Dentrix and smart ideas to help you solve those challenges. Learn principles from Dentrix experts, discuss real-world scenarios, and prepare an action plan to take back to your office.

If you're tired of manually calculating insurance estimates, apologizing to patients for incorrect insurance portions, or having to call insurance companies to track claims or check eligibility, this class is for you!

Learn how to:

- Increase the accuracy of your insurance estimates

- Track your insurance claims and make sure they are paid on time

- Bill tertiary insurance in Dentrix

- Verify patient insurance eligibility without calling insurance companies

This course is designed for office managers, insurance coordinators, or front office professionals who work with insurance and have at least six months of experience using Dentrix.
