Minnesota Law requires that effective Jan 1, 2011 all providers must establish a plan to implement an electronic prescription drug program that complies with Minnesota Statutes, section 62J.497.

We are pleased to inform you that in 2011 HSPS will be contracting with a “Certified” e-prescribe vendor to create a two-way integration from your practice management software through the e-prescribe module to be received by the selected pharmacy.

Development will begin in 2011 with a scheduled release the same year.

If you have any questions please email us.
