

Streamline Your Imaging Technology with Dentrix Imaging Center

Mix and Match Devices

Integration with 100+ imaging hardware devices (and counting) offers you the freedom to provide the best patient care — your way.

Universal Dental Imaging

One simple, intuitive interface allows you to manage all types of images, including:

- Intraoral
- 2D/3D
- Pano
- Ceph
- CAD/CAM

Built-in Tools

Image processing tools make it easy to enhance your high-quality images with measurements, annotation, filters and more.

DENTRIX IMAGING CENTER

The Universal Imaging Solution
Inside Your Practice Management System

SIMPLIFY YOUR IMAGING PROCESS

Enhance efficiency with Dentrix Imaging Center, an integrated imaging solution that works with more than 100 hardware imaging devices.

Because it's part of your Dentrix practice management platform, Dentrix Imaging Center offers a seamless, efficient workflow. You'll benefit from more time to focus on patients as you reduce the amount of time spent manipulating imaging software during appointments and searching for images to submit with insurance claims.

WORK WITH THE EXPERTS YOU TRUST

Dentrix Imaging Center is supported by the experts at Dentrix, who offer assistance with imaging integration as well as training, coaching, content and more.

Instead of troubleshooting your imaging software with multiple imaging vendors and systems, you'll get help from the trusted team that understands your practice management system inside and out.

How many imaging software packages does your practice need? One.

 DENTRIX.COM/IMAGING

BENEFITS

- Seamless integration with 100+ hardware imaging devices eliminates the hassles of third-party software.
- Simple management of all your images and hardware within Dentrix provides a complete imaging and practice management solution that doesn't require switching between systems.
- Fast, one-click access to your latest images or all images for specific teeth means you don't have to waste time searching.
- Images appear as thumbnails in Chart and can be viewed directly from Chart for diagnosis, comparison, patient education or sharing with other providers.
- Acquisition of a new image automatically updates the patient re-care record and enters charges into Ledger, saving time for your team and reducing errors.
- You can rely on the Dentrix support team to troubleshoot all issues so you don't have to contact multiple vendors.

KEY FEATURES

- The only solution to offer a seamless imaging workflow between multiple imaging devices and Dentrix.
- Acquire, analyze and store all of your images within Dentrix — for one complete imaging and practice management system.
- Quickly save new images and load existing images with a single click. View images directly from Chart with simultaneous data display.
- Refine your high-quality images with measurement, annotation, magnification and zoom, image enhancement filters, spotlight and more.
- Automatic updates to patient re-care and billing when new images are acquired. With Dentrix G7.3 and above, automatically find and attach images to insurance e-claims.
