

EXPAND YOUR ABILITY WITH DENTRIX SMART IMAGE

Treatment capabilities and patient experience go hand in hand. Expand both with Dentrix Smart Image, a new way to diagnose, educate and empower your imaging within Dentrix.

Dentrix Smart Image At-A-Glance:

1. *Expand your care and profits with all patient images available in the patient chart*
2. *Expand your clinical efficiencies with centralized image access for multiple vendors*
3. *Improve your staff productivity with automated ledger and re-care entries*

EXPAND YOUR CARE AND YOUR PROFITS

Dentrix Smart Image delivers a new, faster workflow for acquiring diagnostic 2D and 3D images, associating them with the correct CDT codes and displaying them in the patient chart. This powerful, unified process increases staff productivity, saves time by streamlining office workflows and helps ensure you get paid for the procedures you perform.

IMPROVE YOUR STAFF PRODUCTIVITY

Every time you acquire diagnostic images without Smart Image, there's potential for oversights that cost time and revenue. Smart Image starts each image acquisition with selecting the correct CDT codes. This helps improve accuracy—and decrease time—by labeling images for later recall. For select vendors, imaging procedures are also posted to the ledger, progress notes, and recare—saving time while increasing accurate tracking.

EXPAND YOUR CLINICAL EFFICIENCIES

Standalone imaging solutions slow your own when you switch in and out of the practice management system during treatment. Smart Image enhances your clinical efficiencies because it connects image acquisition to the patient chart, giving you access to digital image thumbnails from many different 2D and 3D devices - without leaving Dentrix.

“Dentrix Smart Image is a major step forward in our goal to automate the practice. This tool allows us to make more efficient solutions from multiple imaging systems available to the clinician in one location. Best of all, it allows you to then manage and automate your imaging needs within your practice management software.”

~ Bruce Lipsig, Director, Henry Schein Imaging

STREAMLINE YOUR OFFICE WORKFLOW

Avoid payment delays due to inaccurate CDT codes. Dentrix Smart Image associates your digital images with the correct CDT codes and then automatically posts the imaging procedure to the ledger. This helps improve billing accuracy and streamlines the insurance management process.

NEW VENDORS AND INTEGRATIONS

Dentrix Smart Image is a new standard in dental imaging integration. Check out the URL below to see the latest list of compatible vendors.
