There is much more to treatment planning than just creating treatment cases!

Learn best practices and get practical tips to better organize, track, and present treatment plans.

Learn how to:

- Organize treatment plans and make them easier to find
- Update treatment plan fees and be confident that they are correct
- Track treatment plan details and measure totals against goals
- Present plans to patients in a way that makes sense to them
- Find patients that need to come in for treatment

This class is recommended for:

Dentists, treatment coordinators, assistants, and anyone who works with treatment plans in Dentrix
